

Our experience ~ your quality

NF Oceanic Melt blown Cartridges

Applications:

Food and Beverage processing
Metal finishing/Plating solutions
Municipal water systems
Paint and coatings
Pulp and paper
RO pre-treatment
Solvent filtration

Oceanic & Lagoon cartridges

NF Oceanic cartridges are melt blown cartridges with smooth and rough outer surface. These depth cartridges are made of food grade Micro-Denier melt blown filtration fibre with a thermal bond technology. Oceanic cartridges are three-layered structure with coarse outer layer, semi coarse middle layer and inner layer with fine fibres. They are designed for high dirt retaining, coupled with lower pressure drop and longer service life. Oceanic cartridges are available in micron rating of .05/1/5/10/25/50/75/100 in various length and diameter.

Benefits.

A:

Continuously graded pore structure enhances dirt-holding capacity

B:

A 100% polypropylene material of construction provides wide chemical resistance to bases, acids, salts and many organic solvents in a broad range of application.

C:

All materials are FDA listed for food and beverage contact

D:

Free surfactants, binder, and adhesives

E:

Cartridges can easily be disposed by incineration.

F:

Available in many different sizes and length.

G:

3 layer constructions. (coarse/semi coarse/fine.)
